

SMARt Steps Program:

Dynalloy's SMARt Steps Program is designed to assist students and universities with their research endeavors. We can usually provide discounts at approximately 30% of published price for the same products and services.

The SMARt Steps approval process uses five basic steps:

- 1) Fulfillment of the basic information below
- 2) Submission of an outline of your project for review. (Typically 1 page, along with support pictures, data, etc. Including: goals, timeline, material requirements, and projected technical assistance needed from Dynalloy).
- 3) An understanding that student or group will send Dynalloy, Inc. a final copy of the work when complete, as well as periodic updates when Dynalloy requests this information, or when the student requests more materials.
- 4) Student must use Flexinol® and Dynalloy, Inc. in their publications where applicable.
- 5) An understanding that Dynalloy can then publish the work as long as the University and program members are acknowledged appropriately in the republications.

Basic Information:

Student Name:

Student Phone #:

Student Email Address:

Student Mailing Address:

Professor(s) or Mentor Name:

Professor(s) or Mentor Phone #:

Professor(s) or Mentor Email Address:

Project Name & Type:

Project Timeline:

General Application:

Type of Industry:

Is the final project intended for one time or commercial production?
